AI Prompt Library: Definition of Done (DoD)

Use these prompts with your favorite AI tool (ChatGPT, Claude, Gemini) to clarify and validate your team's Definition of Done for any type of work.

◆ Foundational Prompt

PROMPT:

```
"Create a comprehensive Definition of Done for Agile user stories that includes:  
- Code standards  
- Testing requirements  
- Documentation  
- Stakeholder approval  
- Deployment criteria  
Format as a checklist."
```

◆ DoD by Work Type

Frontend Feature

PROMPT:

"Create a DoD checklist for a frontend feature including browser compatibility, accessibility checks, and UI test coverage."

Backend/API

PROMPT:

"Build a Definition of Done for a backend API endpoint that includes code coverage, error handling, API documentation, and performance testing."

Bug Fix

PROMPT:

"Write a lightweight Definition of Done for a critical bug fix that still meets quality standards."

Technical Debt / Refactor

PROMPT:

"Suggest a DoD for refactoring legacy code that includes code quality improvements and no regression validation."

◆ Story-Specific DoD Enhancer

PROMPT:

"Given this user story, refine the Definition of Done to align with the acceptance criteria:
[Paste user story and AC here]"

◆ **DoD Completion Validator**

PROMPT:

"Check this Jira ticket's data (comments, commits, attachments) and flag which DoD items are missing or incomplete."
