

Gestalt Design Principles Cheatsheet

Radiant Agility Technology

Key Principles:

1. Proximity - Group related elements together
2. Similarity - Use consistent colors, fonts, and shapes
3. Closure - Implied shapes create visual unity
4. Continuity - Guide the eye through design flow
5. Figure/Ground - Clear contrast between elements

Application in Agile Teams:

- Use proximity to group related UI components
- Apply similarity for consistent design systems
- Leverage continuity for user flow design
